RE: Engineering Analyst

Dear Hiring Manager,

I'm excited to apply for the Engineer Analyst position at Goldman Sachs. As a Computer Science & Engineering student at Sant Longowal Institute of Engineering and Technology (CGPA: 8.95/10), I've always been drawn to the intersection of technology and finance. I'm eager to bring my technical expertise and problem-solving skills to contribute to meaningful solutions in a dynamic and fast-paced environment like yours.

During my academic journey and through hands-on internships, I've gained solid experience in full-stack development using technologies like React, Node.js, MongoDB, and Flask. My work at Prodigy Infotech involved building responsive web applications and integrating APIs, while my internship at Compass Technologies introduced me to Python and backend development. I also worked at Solitaire Infosys, where I optimized driver and user location services.

My final year project, ExploreEase, is a travel platform built using Next.js, PostgreSQL, and TypeScript, where I integrated secure online ticket purchasing and responsive UI elements with Tailwind CSS. Additionally, I developed DevLog: Chronicles of Code, a blogging application using the MERN stack, where I focused on enhancing load times and ensuring smooth authentication with Google Auth.

What excites me most about Goldman Sachs is the opportunity to apply my analytical mindset and technical skills to real-world challenges while collaborating with diverse teams. I'm confident that my ability to approach problems with a detail-oriented and innovative perspective, along with my passion for continuous learning, aligns well with the values and mission of your firm.

I'd love the chance to discuss how I can contribute to Goldman Sachs and am looking forward to hearing from you.

Thank you for considering my application. I would welcome the opportunity to further discuss my qualifications and how I can contribute to the ongoing success of your team.

Best regards,
Paras Singla
